

# How to size SEG prints to frames.

## Step 1.

- Measure outside dimensions of frame

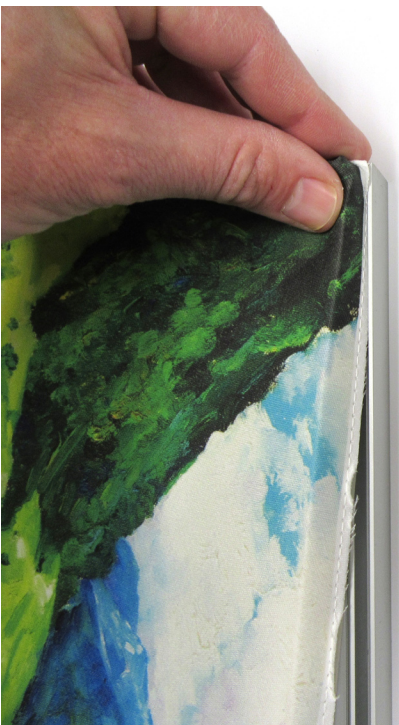

Example frame: 11" w x 15" t

## Step 2.

Example frame: 11" w x 15" t

- The print needs 3/8" bleed all around.
- Finished print size needs to be: 11 3/4" x 15 3/4".
- Sew silicon strip (Keder) to 4 outside edges of the back of print.

## Step 3.

Inserting the finished graphic in frame.

- Start with inserting 4 corners.

## Step 4.

After 4 corners are in.

- Finish by Inserting top, bottom and then the sides.
