

X-Glass™ products are polyester and polypropylene films with a unique polymer technology that allows the film to cling to glass and other smooth surfaces. The result is a durable film with soft peel that mimics static cling with increased outdoor and cold-weather performance.

X-Glass films are also print treated or top coated for UV and conventional inks. X-Glass Ultra Clear comes with a clear PET liner for the best clarity available, while the Clear and White versions utilize a smooth 90# paper liner for a budget friendly option with comparable performance features.

TYPICAL APPLICATIONS

- Window graphics
- Grocery fridge or freezer graphics
- Point-of-purchase displays
- Oil change decals
- Protective films
- Promotional multi-color labels and decals
